

TANGLAW ROMAN

CURRICULUM VITAE

Pron.: /tang-láu román/
Email: tanglaw.roman@sydney.edu.au
Phone: +61 2 935 13384

CORE INTERESTS

- Renewable resources, clean energy technology and sustainable materials
- Electronic structure, excitation, exchange and correlation
- High-performance computing for ab initio molecular dynamics
- Quantum computing algorithms for chemistry and condensed matter physics
- Linux and open-source solutions
- Education – physics, physical chemistry, quantum chemistry, materials engineering
- History and philosophy of Science

RESEARCH AND TEACHING EXPERIENCE

Research Associate & Lecturer

*The University of Sydney Nano Institute (Sydney Nano)
and the Condensed Matter Theory Group, School of Physics*
The University of Sydney, New South Wales, Australia

November 2019 – present

- Research areas:
 - Resolving mechanisms of CO₂ reduction on emerging nanocatalysts
- Auxiliary Supervisor to postgraduate research students (PhD and MS students)
- Courses taught:
 - PHYS3036 Condensed Matter and Particle Physics

Research Fellow & Lecturer

Condensed Matter Physics, School of Mathematics and Physics
The University of Queensland, Brisbane, Australia

March 2019 – October 2019

- Research areas:
 - Superexchange interactions in metal-organic spinchains for quantum communication
- Supervised the capstone research projects of two undergraduate students (PHYS3900)
- Courses taught:
 - PHYS4030 Condensed Matter Physics: Electronic properties of crystals (30% role) - Honours
 - PHYS7033 Condensed Matter Physics: Electronic properties of crystals (30% role) - Masters

Research Fellow

Centre for Theoretical and Computational Molecular Science
Australian Institute for Bioengineering & Nanotechnology (AIBN)
The University of Queensland, Brisbane, Australia

November 2017 – April 2019

- Research areas:
 - Transport properties of polymers and superionic conductors under equilibrium and non-equilibrium conditions
 - Electrochemical energy storage technology
- Coordinator, seminars of the Centre for Theoretical and Computational Molecular Science (joint monthly seminars of computational materials groups University of Queensland, Queensland University of Technology, and Griffith University)

Academic Staff Member & Research Systems Administrator

Institute of Theoretical Chemistry, Faculty of Natural Sciences
Ulm University (Universität Ulm), Ulm, Germany

August 2010 – October 2016

- Research areas:

- Dynamic structure of solid-liquid interfaces
- Modified electrode work functions arising from adsorption-induced surface dipoles
- Anion coverages on electrodes
- Electron transfer at the electrochemical interface
- Managed all computing facilities, network file systems and Linux workstations of the Institute of Theoretical Chemistry
- Managed projects at the Leibniz Supercomputing Centre
- Handled tutorials in Quantum Mechanics for undergraduate Chemistry students

Research Assistant Professor

*Division of Precision Science & Technology and Applied Physics, Graduate School of Engineering
Osaka University, Osaka, Japan (大阪大学大学院工学研究科・応用物理学専攻)*

April 2010 – June 2010

- Research areas:
 - Reversible hydrogen reactions for next-generation battery technology and oxygen dissociative adsorption dynamics
 - Lectured on solid state physics to graduate students

Research Scientist

*Department of Applied Physics, Graduate School of Engineering
Osaka University, Osaka, Japan*

May 2004 – March 2005

- Research areas:
 - Computational analysis of strong adhesion of thermoplastics with metals
 - Structural, electronic and magnetic properties of modified carbon nanotubes
- Organized the Osaka University – De La Salle University Science Research Workshops and established its conference proceedings

Assistant Instructor

*Department of Physics, College of Science
De La Salle University, Manila, Philippines
October 2003 – April 2004*

- Research areas:
 - Multi-instrument determination of properties, spatial and temporal distribution of urban atmospheric aerosols
 - Lectured on general physics and supervised laboratory work for science, engineering and liberal arts undergraduate students

HIGHER EDUCATION

Doctor of Philosophy in Engineering

*Precision Science Technology & Applied Physics
Osaka University, Osaka, Japan
April 2007 – March 2010*

Dissertation: *Structural and dynamical properties of hydrogen in graphene and platinum surface systems (online)*

Master of Engineering

*Applied Physics
Osaka University, Osaka, Japan
April 2005 – March 2007*

Thesis: *Toward a hydrogen economy: high-uptake hydrogenation and quantum migration*

Bachelor of Science, Magna cum laude

*Physics with specialization in Computer Electronics/Applications
De La Salle University, Manila, Philippines and National University of Singapore, Singapore
June 1999 – September 2003
January 2002 – December 2002 (coursework in Singapore – 29 lecture and lab units)
Thesis: *Retrieval of cloud and aerosol depolarization and optical properties using two-wavelength multi-angle lidar sensing**

RESEARCH HIGHLIGHTS

- 50 peer-reviewed journal articles
- Including top-tier journals such as *Physical Review Letters* and *Advanced Materials*
- 67 co-authors
- h-index: 19 (Google)
- Citations: 1066 (Google)
- 7 publications with more than 50 citations
- 1 book chapter
- Reviewer for journals including *Nature Communications* and *Advanced Materials*

PUBLICATIONS

Book chapters

1. T. Roman and H. Kasai, *Structural and electronic properties of hydrogenated graphene*, Carbon Nanomaterials for Gas Adsorption, edited by M.L. Terranova, S. Orlanducci and M. Rossi (2012), Pan Stanford Publishing/CRC Press

Peer-reviewed journal articles (with external links)

1. S. Sakong, D. Mahlberg, T. Roman, M. Li, M. Pandey, A. Groß, *Influence of local inhomogeneities and the electrochemical environment on the oxygen reduction reaction on Pt-based electrodes: A DFT study*, *ACS Catalysis*, submitted.
2. A. Baktash, J. Reid, T. Roman, D.J. Searles, *Diffusion of lithium ions in lithium-argyrodite solid state electrolytes from equilibrium and nonequilibrium molecular dynamics simulations*, *NPJ Computational Materials* (2020), accepted ([arXiv](#)).
